IGUS Software

PROJECTS

A Study on Analyzing the Influence of Traffic Disruptions on Supply Chain Efficiency in Hyderabad Retail Sector

- This study examines how traffic disruptions in Hyderabad affect retail supply chain efficiency. Frequent congestion, road work, and unplanned construction lead to delivery delays, higher costs, and reduced reliability. It highlights key issues like longer lead times and poor inventory flow.
- The study suggests solutions like route optimization, improved infrastructure, and flexible delivery schedules to enhance supply chain performance.

Integration of Solar and Wind Energy

it is done in my final year in this project we integrated both the solar and wind energy my the help of micro-controller ATMEGA328 and Arduino board

Optimizing E-Commerce Logistics and Last Hyderabad’s Retail Sector

- Conducted a study on optimizing e-commerce logistics and last-mile delivery in Hyderabad, focusing on infrastructure challenges and customer demand.
- Analyzed in-house vs third-party logistics models and evaluated the impact of AI, ML, and data analytics on delivery efficiency.
- Provided insights to improve supply chain performance, reduce delivery delays, and support better logistics and policy decisions.
